Front Inside

Introducing Merino FABWOOD The Future of Furniture

Merino FABWOOD is India's
First Health-Friendly Super
Strong (HFSS) Chipboard.

Health-friendly

Merino FABWOOD is an E1 grade chipboard, adhering to the most stringent European standards, ensuring a significant reduction in harmful formaldehyde emissions that are carcinogenic and detrimental to health.

Super strong

Superior core construction of Merino FABWOOD attributed to proprietary Chip Weave Technology and 3D bonding resulting in uniform density and exceptional strength across the cross-section of the board.

Versatile designs

FABWOOD'S prowess extends beyond its strength, reshaping the future of designs. With a wide array of exclusive designs and textures, FABWOOD adds a touch of natural elegance and luxury charm to interiors.

Sustainable

More than 1 crore plant afforestation every year becomes the source material for FABWOOD, making it one of the most sustainable products in industry.

Chipboard Structure

Fine Wood Chips (Face Layer)

Coarse Wood Chips (Core)

Fine Wood Chips (Face Layer)

Pre-laminated Chipboard

Decorative paper

Chipboard

Decorative paper

Chip Weave Technology core construction interlocks wood chips, optimizing the gap between them, resulting in unmatched mechanical and physical properties.

3D Chip Bonding provides bonding across all dimensions thus ensuring zero chipping while cutting.

Merino FABWOOD

- Merino FABWOOD Chipboard
- Solid Construction.
- Classifier and Windformer with CPS+Technology.

- Latest Advanced Manufacturing Technology with Industry 4.0.
- Fine and resin-filled flakes are in a sequence from face to face with the graded chips in the core.
- Calibrated Chip with density and size, making homogeneous core, without any core gap.
- Dimensionally stable product with Intensified Internal Bond.
- Manufactured using wood flakes.

Regular Particle Board

- Normal Particle Board
- Normal 3-Layered Particle Board

- Old Manufacturing Technology
- Chips are in random sequence, forming the core
- Creating space between chips in the core.
- Loosely packed mass with lower core density and internal bond
- Manufactured in Multi-daylight Presses
